<u>Overview :</u> Day 5 of the Marketplace Builder Hackathon focuses on testing, error handling, and backend integration refinement. The goal is to ensure that your marketplace is thoroughly tested for real-world deployment, with emphasis on performance optimization, error handling, cross-browser compatibility, and backend integration. By the end of Day 5, you should have a fully functional, responsive, and secure marketplace ready for customer-facing traffic.

Details of Individual Test Cases Test Case:

TC001 - Validate Product Listing Page

<u>● Test Steps:</u>

1. Open the Product Listing Page.

2. Validate that all products are displayed correctly.

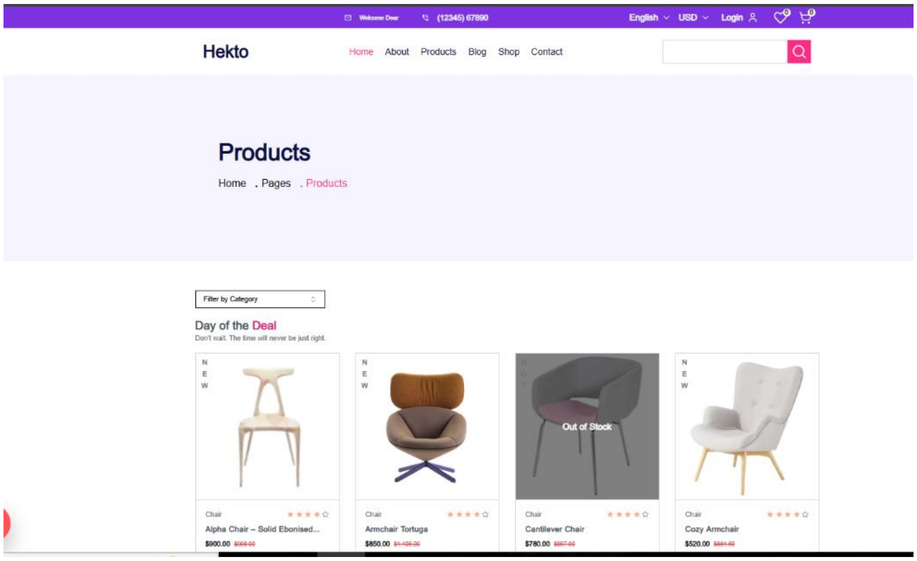
<u>● Expected Result</u>

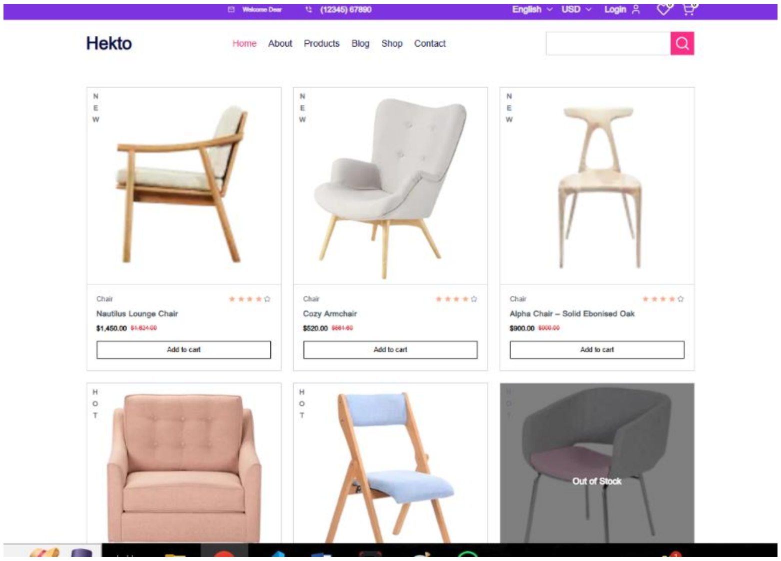
: All products should load and display successfully.

<u>● Actual Result:</u>

Products displayed perfectly without issues.

- Status: Passed
- Security Level: Low Remarks: Displayed Perfectly.





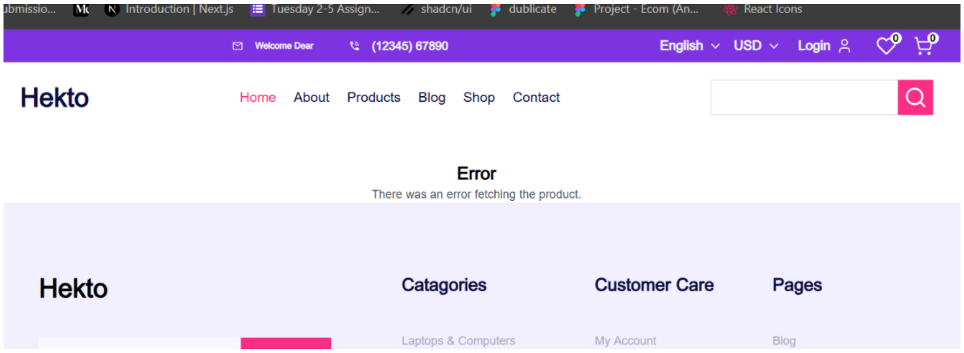
Test Case: TC002 - Test API Error Handling

- Test Steps: 1. Disconnect Qroq Query intentionally. 2. Refresh the page

. ● Expected Result: Error message should be displayed clearly on the screen.

- Actual Result: Error message displayed successfully.
- Status: Passed

- Security Level: Low
- Remarks: Displayed Successfully

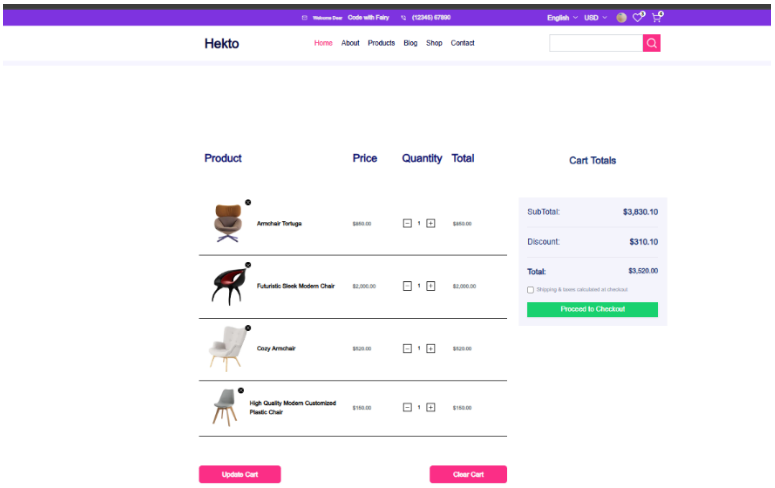


Error

There was an error fetching the product.

Test Case: TC003 - Check Cart Functionality

- Test Steps: 1. Add items to the cart. 2. Verify the cart contents.
- Expected Result: Cart should update with the added products.
- Actual Result: Cart updated as expected.
- Status: Passed
- Security Level: Medium
- Remarks: Works as expected



Product	Price	Quantity	Total
Armchair Tortuga	$850.00	1	$850.00

Conclusion for E-Commerce Website Testing

By thoroughly conducting multiple test cases on the Hekto E-commerce platform, we ensured the functionality, responsiveness, and reliability of the website across various scenarios. Below are the key highlights of the testing process:

1. Product Display and Listing

- All products were successfully displayed without any issues on the Product Listing Page.
- This ensures a seamless browsing experience for users and highlights the platform's reliability in managing product data.

2. API Error Handling

- Error messages were handled effectively.
- Users were clearly informed about any issues with data fetching or connectivity, enhancing the user experience during unforeseen technical glitches.

3. Cart Functionality

- The cart functionality was tested for accurate updates.
- It performed as expected, allowing users to add, view, and interact with their selected products without errors.

4. Search Functionality

- The search bar was validated for both existing and non-existing products.
- The expected dropdown behavior (e.g., "No Product Found") was observed, helping to guide users effectively.

5. Dynamic Product Pages

- Detailed product pages were dynamically rendered as expected.
- Users were able to view and explore product details effortlessly.

6. Cross-Browser Compatibility

- The website was tested across multiple browsers, including:
  - **Chrome**
  - **Firefox**
  - **Edge**
- Functionality and layout remained consistent, ensuring a wider audience reach.

7. Responsiveness

- The platform's responsiveness was tested on mobile and tablet devices.
- The layout adjusted perfectly to different screen sizes, providing a smooth user experience across all devices.

Conclusion

The testing process confirmed that the Hekto E-commerce platform meets the essential standards of functionality, reliability, and user experience. Key areas such as product display, cart functionality, and cross-browser compatibility performed optimally, ensuring a seamless and inclusive experience for all users. By addressing potential issues like error handling and responsiveness, the platform is well-prepared to cater to diverse user needs effectively.
